

Project Planning Phase

Project Planning Template (Product Backlog, Sprint Planning, Stories, Story Points)

Date	19 July 2026
Team ID	
Project Name	AI-Powered Debt Relief & Financial Recovery Platform
Maximum Marks	5 Marks

Product Backlog, Sprint Schedule, and Estimation (4 Marks)

Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task	Story Points	Priority	Team Members	
Sprint-1	Project Setup	USN-1	As a developer, I can scaffold the FastAPI backend with SQLAlchemy models for Loan and NegotiationHistory	2	High		
Sprint-1		USN-2	As a developer, I can scaffold the React frontend with routing for Dashboard, Add Loan, and Loan Detail pages	2	High		
Sprint-1		Loan Intake	USN-3	As a borrower, I can enter my loan details (outstanding amount, EMI, overdue months, monthly income) through the Add Loan form	3	High	
Sprint-1			USN-4	As a borrower, I can view a list of all my loans	1	Medium	
Sprint-1			USN-5	As a borrower, I can delete a loan I no longer need to track	1	Low	
Total Story Points in Sprint-1				9			
Sprint-2	Financial Analysis	USN-6	As a borrower, I want the system to calculate my EMI ratio and monthly surplus from my loan data	2	High		
Sprint-2		USN-7	As a borrower, I want to see a debt-stress score (0-100) mapped to Low/Moderate/High/Critical	3	High		
Sprint-2		USN-8	As a borrower, I want to see a recommended settlement percentage based on my stress level	3	High		
Sprint-2		USN-9	As a borrower, I want my analysis shown as a visual stress gauge (StressGauge component)	2	Medium		
Total Story Points in Sprint-2				10			
Sprint-3	Negotiation Letter Generation	USN-10	As a borrower, I can choose a negotiation letter type and tone	1	High		
Sprint-3		USN-11	As a borrower, I want the system to generate a personalized letter via Gemini, grounded in my real loan numbers	5	High		
Sprint-3		USN-12	As a borrower, I want the system to fall back to a template-based letter if the Gemini API is unavailable	3	Medium		
Sprint-3		USN-13	As a borrower, I can view past negotiation letters generated for a loan	2	Medium		
Total Story Points in Sprint-3				11			
Sprint-4	Financial Health Dashboard	USN-14	As a borrower, I want a dashboard showing aggregate financial health stats across all my loans	3	High		
Sprint-4		USN-15	As a borrower, I want to see my settlement history over time	2	Medium		
Sprint-4		Deployment	USN-16	As a developer, I can deploy the backend to Render and the frontend to Vercel	2	High	
Sprint-4			USN-17	As a developer, I can add a health-check endpoint for monitoring	1	Low	
Total Story Points in Sprint-4				8			

Project Tracker, Velocity & Burndown Chart (4 Marks)

Sprint	Total Story Points	Duration	Sprint Start Date	Sprint End Date (Planned)	Story Points Completed (as on Planned End Date)	Sprint Release Date (Actual)
Sprint-1	9					
Sprint-2	10					
Sprint-3	11					
Sprint-4	8					

Duration, Start/End Dates, Story Points Completed, and Release Dates to be filled in as each sprint is planned and executed.

Velocity

Total Story Points across all sprints = 9 + 10 + 11 + 8 = 38. Number of Sprints = 4.

$$Velocity = Total\ Story\ Points / Number\ of\ Sprints = 38 / 4 = 9.5\ Story\ Points\ per\ Sprint$$

Once actual sprint durations are set, the team's average velocity per day can be calculated as: AV = Sprint Duration ÷ Velocity, following the same method illustrated in the Project Planning Template.

Burndown Chart

A burndown chart is a graphical representation of work remaining versus time, commonly used in Scrum to track a sprint's progress. It will be generated once actual sprint execution data (story points completed per day) is available.
